And...
Where are we now?

As of April 30th, 2024, 18:30 GMT-5, our follower count is:

768

This account was originally created with the goal of reaching 3000 followers within the span of 3 weeks, a task proven to be difficult by the limitations in spare time to both create consistent images and manage the account regularly. However, to this date we have created the start of a consistently growing community which given, more time, could reach and exceed our goal.
